September 23, 2015

Mr. Richard Tabish
Basin Industrial Services, Inc.
955 Beech Street
Missoula, Montana 59807

Dear Rick:

In response to your August 2015 request, EPA, in consultation with DEQ, generally approves Basin Industrial Services/Premier Industries, LLC petition to use slag from the Anaconda Smelter Superfund site for Pig-Iron and Glass Proppant manufacturing. State approval is conditional upon demonstration that slag contaminants will not adversely affect State groundwater.

Potential manufacturing users of the Anaconda Smelter slag material must obtain the necessary approval/permits for its industry/site-specific use from the appropriate regulating entities, including federal, state and local officials, where the manufacturing is to take place. This may include RCRA to address any new waste components. Please note that the Atlantic Richfield Company is the current owner of the slag material.

Additionally, for any on-site processing and/or manufacturing at the Anaconda Smelter site, users must develop a Processing/Operations Plan and must obtain necessary approvals/permits from the appropriate federal, state and local officials, including EPA, DEQ, and Anaconda-Deer Lodge County, as specified in Section 4 of the Final Slag Operations and Closure and Reclamation Plans.

If you have any questions, please give me a call.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles Coleman".

Charles Coleman
Anaconda Project Manager
